

Innovative GNSS Test Solutions

VBOX

AUTOMOTIVE

VBOX 4

Engineered for versatility, **VBOX 4** excels at a wide range of automotive testing applications including brake testing, ADAS sensor validation and dynamics.

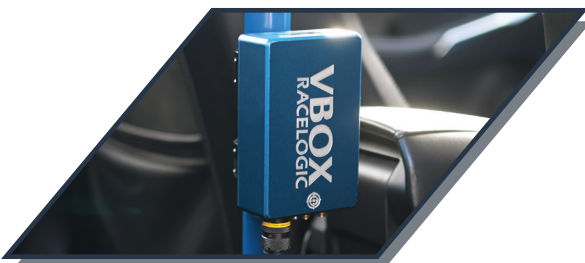

IMU05

IMU05 utilises cutting-edge technology to provide a significant advancement in accuracy and ease of use, while maintaining a cost-effective price point.

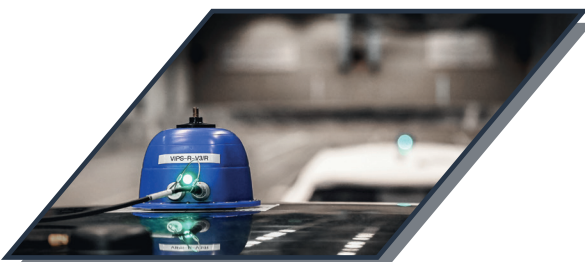

VBOX TOUCH

Versatile touchscreen data logger, offering robust centimetre-level positional accuracy and the precise measurement of speed and distance.

VBOX3i SDR

A compact GNSS-aided Inertial Navigation System (INS) with integrated IMU ideal for brake, tyre and performance testing.

INDOOR POSITIONING

A highly accurate way of measuring speed, position and attitude in areas where GNSS is unavailable or unreliable.

Total Testing With VBOX

VBOX AUTOMOTIVE

VBOX 4 is compatible with a wide range of VBOX sensors, modules and accessories to provide engineers with a comprehensive test solution.

All data can be viewed in real-time or analysed in post-process using our highly intuitive data analysis software, **VBOX TEST SUITE**.

Live and post-test analysis
with customizable UI

Free Lifetime Support

Exceptional customer support is provided free of charge with no support contracts, including all future firmware and software updates.

Calibration Service

RACELOGIC is an accredited ISO calibration laboratory and offer a reliable and fast calibration service including ISO 17025.

Global Distributor Partners

A global network of sales and service partners provide a local point of contact for product information, support and sales.
